

Baby, I know I can see what you like
As your standing by the dance floor
Maybe you got something else you need to find
I can feel it that you want more

Take your body over to the floor
It's much too soon to hit the door
Stop, let's make it tonight, don't fake it
There's no need to analyse
Now's the time to recognise
Go and jump in the light and baby

Dance, let the music take you over
Dance, let the beat become your lover
Dance, you can't stop it baby it's your life, woah woah

Lately, you been searching for the other side
There's a feeling to discover
Baby, you can feel it in the air tonight
Let the groove just take you over

Take your body over to the floor
It's much too soon to hit the door
Stop, let's make it tonight, don't fake it
There's no need to analyse
Now's the time to recognise
Go and jump in the light and baby

Dance, let the music take you over
Dance, let the beat become your lover
Dance, you can't stop it baby it's your life, woah woah

Dance, let the music take you over
Dance, let the beat become your lover
Dance, you can't stop it baby it's your life, woah woah

I been thinking it's time to discover
A new religion from one to another

Dance, let the music take you over
Dance, let the beat become your lover
Dance, you can't stop it baby it's your life, woah woah

Dance, let the music take you over
Dance, let the beat become your lover
Dance, you can't stop it baby it's your life, woah woah

Dance
