

Straight from the Heart

S Club 7

I see my future there in your eyes
Together and forever, it's you and me
You see 'cause I won't be listening to what my friends have got to say
I know they'll be there all the way

You promised, and I know that you will always care
Through good times, and through bad times
You're always there

Hold me now don't ever let it go
I'm in love with you but you already know
I want this love to last and be forever
If you believe and you can only see
That making love to me would make your life complete
Hold me tight and say you'll leave me never
Straight from the heart you've changed my life forever, forever more

I dream of waking up in your arms
And watch the sun bring in the day
You see, what I can imagine
I am sure we can achieve
Which means never giving up on this dream

You comfort and you guide me
When skies are grey
And I feel you, and I need you
Just say you'll stay

Hold me now don't ever let it go
I'm in love with you but you already know
I want this love to last and be forever
If you believe and you can only see
That making love to me would make your life complete
Hold me tight and say you'll leave me never
Straight from the heart you've changed my life forever more,

Forever more
Forever more
Changed my life

You promised, and I know that you will always care
Through good times, and through bad times
You're always there

Hold me now don't ever let it go
I'm in love with you but you already know
I want this love to last and be forever
If you believe and you can only see
That making love to me would make your life complete
Hold me tight and say you'll leave me never
Straight from the heart you've changed my life forever

Straight from the heart you've changed my life forever
