

## Panzer Battalion

Sabatón

Under this sun no shadows will fall  
Piercing our eyes as we charge  
An armoured battalion on course to the east  
Closing the end of it's march

This time we're here to finish a job  
Started a decade ago  
Driving the animals out of their holes  
To bury them 6 feet below  
Armoured tanks of mass destruction  
Killers in the east  
Rats who dares to stand before us  
Feel our guns go live

Death in the shape of a panzer battalion  
Insect of terror don't run face your fate like a  
Man cannot outrun our panzer battalion

Thousands of tons of armour and guns  
Making it's way through the sand  
Our panzer battalion is back for revenge  
Artillery sweeping the land

First strike is ours no mercy is shown  
There's rivers of blood in our track  
Breaking their lines of defence with our tanks  
Infantry watching our back

Blow their SAM sites clear for air strike  
Ready for the storm  
Minefields swept there's no surrender  
Feel our napalm burn

Under this sun no shadows will fall  
Piercing our eyes as we charge  
An armoured battalion on course to the east  
Has reached the end of it's march
