## Crawling

## Sacred Reich

You say you're misunderstood I say you give it real good Now you work your way back You're crawling

You say you've always been there I say I don't understand You say you're back for good You're crawling

But your time now is gone You try to hang on Try to stay on your feet But now you're crawling, crawling To me Crawling, crawling Back to me Crawling, crawling

Is this what you want Take it right back to the start When you fall on your face You're crawling

Try it all on your own Give it all that you know But when you come up short You're crawling

But your time now is gone You try to hang on Try to stay on your feet But now you're crawling, crawling To me Crawling, crawling Back to me Crawling, crawling

Now you want all of my time I see what you are like Enter into my life Crawling

You know no words to say You always like to play When on your hands and knees You're crawling

But your time now is gone You try to hang on Try to stay on your feet But now you're crawling, crawling To me Crawling, crawling Crawling, crawling Back to me Crawling, crawling
