Haunt Me

Haunt me In my dreams If you please You're breath is with me now and always It's like a breeze So should you ever doubt me If it's help that you need Never dare to doubt me

And if you want to sleep I'll be quiet Like an angel As quiet as your soul could be If you only knew You had a friend like me

So should you ever doubt me If it's help that you need Never dare to doubt me
