Look at me-- can you see A reason for these questions We've come so far It's only started Let's not end up broken hearted We feel much more for each other Than we care to say We're trapped in a situation Which makes us feel so afraid [Chorus One] You ran away from me But you were hiding from yourself Don't know what to say I know the way I feel I know that -- you want me The same way I want you If you slip through my hands Like water like sand I'll never give up Can you see -- the magic Or do you still have doubts Still trapped in a situation You took the easy way out [Repeat Chorus One] [Chorus Two] Just think of all the times Waiting for this moment There's no better time I know the way I feel No one makes the first move if we wait No one makes a sound or a mistake And I feel as though you're thinking what I think Afraid of stepping out from where we stand And I feel as though you're thinking what I think Afraid of stepping out from where we stand [Repeat Choruses One and Two]
