

Live At Five

Saga

We are working on it every day
To fill you full of doubt
The clock is tickin' & we won't get paid
Unless we knock you out
You know we try to lead a simple life
There is no middle ground
& all we have to do is shine our lights
Where trouble can be found

Now we're live at five
And we'll be here all night
Now we're live at five
Don't look so surprised

If you need some good news
You'll have to wait until we're through
'Cos this isn't life, it's live at five

When it gets ugly you can look away
That's what we're all about
You know to us it's just another day
We're gonna knock you out

Now we're live at five
You'll be up all night
Now we're live at five
Don't look so surprised

If you need some good news
You'll have to wait until we're through
'Cos this isn't life, it's live at five
So who did what to who
We're gonna bring it right to you
And we do it right
We're live at five

Now we're live at five....Now we're live at five

(repeat chorus)
