

Lines

Said the Whale

Well we go off
And every street that we crossed
We spoke aloud to each other
I spit against the wind
Down the cemetery lane
We got some dirt in our nails
And we clicked our heels to the west

I've got the most important line
No, I've got the most important line for you
For you

I've got the most important line
No, I've got the most important line for you
For you

With every stretch of the land
We felt the miles fall behind us
The horizon was brighter
We made some lottery turns, some gambling swerves
For the ex who was played
Oh the choices we made
Important dates and lovers for days

Seems frightful, but it's hardly the case
I got my mommy's advice and my father's attention to every single detail
And if what you said should fail, well, we'll get over it

I've got the most important line
No, I've got the most important line for you
For you

And I know, it breaks your heart to see me letting go
And I know, it breaks your heart to see me letting go

I've got the most important line
I've got the most important line
I've got the most important line
I've got the most important line
I've got the most important line
I've got the most important line
I've got the most important line
I've got the most important line
