Last Days of Disco

Saint Etienne

We just gotta go where it takes us Let nothing, nothing come, come between us Feel the magic in the cold night air Let the music catch us unaware We just gotta go where it takes us Any day we could vanish in a cloud of dust Inhibition, don't get in the way 'Cause tomorrow is another day Let's dance Cut a rug together And now I know you better It's the way that I want it to be Let's dance Cut a rug together Looking at forever It's the way that I want it to be We just gotta move with the right time All I know is I would risk it all to make you mine Won't you tell me if you're out of reach Just the thought of you it leaves me weak Let's dance Cut a rug together And now I know you better It's the way that I want it to be Let's dance Cut a rug together Looking at forever It's the way that I want it to be Waking up and feeling down Meet some friends in Chinatown Tell me if I'm moving too fast Donna says it's time to go Catch a late night picture show Let's make this moment last Yeah Let's dance Cut a rug together And now I know you better It's the way that I want it to be Let's dance Cut a rug together Looking at forever It's the way that I want it to be Let's dance Let's dance It's the way that I want it to be Let's dance Let's dance It's the way that I want it to be
