

All Because of You

Saliva

All because of you
All because of

Something's wrong with me
'Cause I can't even feel you now
Or know that this is real

Am I too blind to see
That there's something there behind your eyes
And it's bringing me to my knees

All I want is you and I don't care
All I want is you and I don't care
'Cause all I do is waitin' and wonderin' and hopin' that we'll survive it
I know that all this is true
All because of you
All because of you

Something's wrong with you
The walls you build around you now
Seem to fit you like a glove

Something's wrong with you
'Cause stars cannot be found in clouds
That cover up their love

All I want is you and I don't care
All I want is you and I don't care
'Cause all I do is waitin' and wonderin' and hopin' that we'll survive it
I know that all this is true
All because of you
All because of you
All because of you

All because of you
All because of you
All because of you
All because of you
All because of you

(All I want is you and I don't care)
All because of you
 (All I want is you and I don't care)
All because of you
 (All I want is you and I don't care)
All because of you
 (All I want is you and I don't care)
