

Choke

Saliva

Your shit talking tongue is over and done
You lead you every word you speak
Remember the taste, poison lips
You're getting what you gave to me

Because it all came around
So swallow it down
While I'm laughing my ass off now

You can choke on every word you said
On every breath
Until you're out of it, I don't care
You can choke on every lie you told
And every word you spoke
Until you're out of it, I don't care
You can choke

You never learn now it's your turn
Suffocated by the truth
It's too late now, should shut your mouth
Karma had it's way with you

Because it all came around
So swallow it down
While I'm laughing my ass off now

You can choke on every word you said
On every breath
Until you're out of it, I don't care
You can choke on every lie you told
And every word you spoke
Until you're out of it, I don't care
You can choke

It all came around
So swallow it down
Look who's laughing now

You can choke on every word you said
On every breath
Until you're out of it, I don't care
You can choke on every lie you told
And every word you spoke
Until you're out of it, I don't care
You can choke

On every word you said
On every breath
On every lie you told
