Sleepless nights, tangled in misery Can't believe the damage I've done Endless fight and I am the enemy Save me from what I've become

I've awaken but I don't how I'm alive
I deserve to be buried underneath dark skies
Am I dreaming from my grave
Or have I fallen so far away
But today I found myself lost for the last time
Lost for the last time

So long, goodbye, yesterday's just a memory Something I could never change Watch it all slip away and the stain still remains But sometimes we need to feel the pain

I've awaken but I don't how I'm alive
I deserve to be buried underneath dark skies
Am I dreaming from my grave
Or have I fallen so far away
But today I found myself lost for the last time
Lost for the last time

I've awaken but I don't how I'm alive

I've awaken but I don't how I'm alive
I deserve to be buried underneath dark skies
Am I dreaming from my grave
Or have I fallen so far away
But today I found myself
Today I found myself lost for the last time

Lost for the last time Lost for the last time
