

No One but Me

Saliva

Let me take it off,
Give you what you want.
We both know this is just a game.
Let me take control,
Feel me in your soul.
Where the angels are afraid.

I love it when you scream my name.
Nobody make you feel the same.
I love to make you come undone.
And I will make you want no one but me.
No one but me.
Want no one but me.
Want no one but me.

A twisted energy,
Chemical release,
Fingernails buried in my back,
I'm feelin' so alive,
Like part of me could die,
Gettin' off before the crash.

I love it when you scream my name.
Nobody make you feel the same.
I love to make you come undone.
And I will make you want no one but me.
No one but me.
Want no one but me.
Fuck no one but me.

I love it when you scream my name.
Nobody make you feel the same.
I love to make you come undone.
And I will make you want no one but me.
No one but me.
Want no one but me.
Fuck no one but me.

No one but me.
