

The Enemy

Saliva

I can't talk to you when all that you hear
All the lies of the others resonating in your ear
Wish I would've known that I'd be the one
Clean up the wreckage from the damage they have gone

Make believe that your heart wasn't broken so badly
You take it out on me
I'm not the enemy
Can't believe that he hurt you so badly
That you still his face when you look at me
I'm not the enemy

Lay your armor down, come into the light
Can't hide forever with his shadow by your side
I wish I would've known I'd always be the one
Buried in the wreckage from a past you can't outrun

Make believe that your heart wasn't broken so badly
You take it out on me
I'm not the enemy
Can't believe that he hurt you so badly
That you still his face when you look at me
I'm not the enemy

I can't talk to you

Make believe that your heart wasn't broken so badly
You take it out on me
I'm not the enemy
Can't believe that he hurt you so badly
That you still his face when you look at me
I'm not the enemy

The enemy
I'm not the enemy
The enemy
I'm not the enemy
