

# A Million Light Years Away From Home

Sally Oldfield

My head is burning, my hands are shaking  
Walking down the street but I don't think I'm gonna make it  
I feel dead among people  
I just can't breathe, can't handle gravity  
Feel like I come from another galaxy  
I'm juts a memory of me

R:

Oh, am I out of my mind from being alone?  
Or am I really a million light years away from home?  
Oh, am I out of my mind from being alone?  
Or am I really a million light years away from home?

My body won't move, my voice won't flow  
Feel like I'm flowing, I don't know where to go  
But it's all because of you  
We were so close and now we're apart  
Where there was you there's just a hole in my heart  
and the night is breaking through

R:

Someone's body is close to mine  
But I feel like I'm on Mars  
Forever lost among the stars

We were so close and now we're apart  
Where there was you there's just a hole in my heart  
and the night is breaking through

R:
