

Ice on Fire

Sally Oldfield

Sea breeze blowing round my knees
And the hidden touch of your hand
You look at me so silently
But every secret sign I understand
And when you touch my hand
My knees grow weak
I feel your breath on me
I can hardly speak

Your love is like ice on fire
Forbidden love is getting stronger
Your love is like ice on fire
And the flame is getting higher
And you know we're gonna surrender

Deep in the night I feel you
Holding me tight
And every breath I take
Brings you near
There's rumours in the air
About the secret we share
And I'm torn between the love we feel
And the guilt we bear

Your love is like ice on fire
Forbidden love is getting stronger
Your love is like ice on fire
And the flame is getting higher
And you know we're gonna surrender

And when you move in close to me
Something in my body's saying
"Why don't we take
It one step higher
To uncontrolled desire"

Ice on fire
Ice on fire

Your love is like ice on fire
Forbidden love is getting stronger
Your love is like ice on fire
And the flame is getting higher
And you know we're gonna surrender

Ice on fire
Forbidden love is getting stronger
Your love is like ice on fire
And the flame is getting higher
And you know we're gonna surrender
