## **Once in Your Life**

Sam Brown

Night falls rain pours just like my tears I feel so alone though you're still here How long can I live on in your world of dreams My love is so strong I feel in my bones This was meant to be Easy make it easy when you need me You know I'll be there

For once in your life believe in me Don't think twice won't you just let me be Your once in a lifetime oh please Open your eyes For once in your life

I watch as clouds cross the evening sky I stand in the shadows of doubt between You and I Easy make it easy when you need me You know I'll be there

For once in your life believe in me Don't think twice won't you just let me be Your once in a lifetime oh please Open your eyes For once in your life
