How To Dream

Sam Phillips

Ah, ah, ah ahh ah ahh When we open our eyes and dream We open our eyes

Ah, ah, ah ahh ah ahh When we open our eyes and dream We open our eyes

Under normal, we change the wind Facing every direction Planted in the future, we live two lives All to reveal a secret we can't hide

Ah, ah, ah ahh ah ahh When we open our eyes and dream We open our eyes

Ah, ah, ah ahh ah ahh When we open our eyes and dream We open our eyes

We search the sky, planets chasing the stars Pulling toward deep affection Weights and numbers measure a wound that won't heal All to reveal a secret we can't hide

Ah, ah, ah ahh ah ahh When we open our eyes and dream We open our eyes

Ah, ah, ah ahh ah ahh When we open our eyes and dream We open our eyes
