## Libera Me

## Sam Phillips

Dreams that I can't trace Pull my heart away From love I long to taste Why do I run away When I come face to face With anything I need

I am so afraid If I keep hoping That there will come a day When my heart is open That you will walk away Like you were never there

And I don't know all the truth From the lying But I know that I need you Because I am dying From being held by hell In a cell of blinding fear

Libera, libera, libera me From this dark dream To the life stream Libera, libera, libera me From this bruised soul Living half-whole Libera, libera, libera me

I know there is a place Free from no borders Before I turn this grace Into disorder I've got to find a way Out of this chaos
