

Partition Blues

Sam Roberts

I must be blind if I can't see
Which part of me is you,
Which part of you is me
We two are bound, we're bounded in
We've been here to the ground and all how we've been
back again

I can't tell which life is mine,
You and I should have seen right from the start
That little girl's gonna break your heart
And they say love is a great divide, I hope we make it
to the other side
They say love is a great divide, I hope we make it to
the other side
In this fading light it's hard to see

What will become of you, what has become of me
Who did we burn, who did we save
What did we learned between the cradle and the grave
We've done this days before, our hearts divided civil
wars
You play a part and you roll the dice
That little girl still saved your life

They say love is a great divide, I hope we make it to
the other side
They say love is a great divide, I hope we make it to
the other side

I'll never be lonely, as long as you hold me
Twilight never gonna be easy to watch your time
I'll never be lonely, as long as you hold me
I found the flames and you pushed them lives
That little girl still saved your life

They say love is a great divide, I hope we make it to
the other side
They say love is a great divide, I hope we make it to
the other side
They say love is a great divide, I hope we make it to
the other side
They say love is a great divide, I hope we make it to
the other side
