

# Cut Me Loose

Sam Sparro

When I hear that bass start to thumping  
Me and my whole body get to jumping  
I snap my neck, my back  
And shake my rump  
And just cut it loose (loose)  
I just cut it loose (hey, hey)

When the day behind you leaves you shattered  
I only know one thing that makes it better  
So call your girls and boys  
And get them out  
To help you cut it loose (cut it loose) Shake that caboose (oh yeah)

Nothing cuts me loose like the music  
I cut a rug up all night long  
When I hear my favourite song  
Nothing cuts me loose like the music  
I said it cut me loose  
It just cut me loose

I want to see you cut it

See that sexy girl over by the bar there? (hi)  
She said, "Hey do you wanna come for a ride in my car yeah?"  
I said, "Sexy girl are you delirious?"  
I can't leave right now these tunes are serious" (hey)

The bass slapped me in the face  
And I stepped so hard I almost shook the place  
Got snare in the air, like a cool breeze  
And those nasty keys are the bee's knees

Nothing cuts me loose like the music  
I cut a rug up all night long  
When I hear my favourite song  
Nothing cuts me loose like the music  
I said it cut me loose  
It just cut me loose  
I cut a rug up all night long when I hear my favourite song  
Music, it takes me away

Sweaty, getting sweaty  
Nothing in the world is quite as nice  
If you get there early, like say by 10:30  
You can get inside the club at half the price  
That's cold as ice

It takes me away  
And it cut me loose  
It takes me away  
Nothing cuts me loose like the music  
It takes me away  
Nothing cuts me loose like the music  
It takes me away
