

# I Wish I Never Met You

Sam Sparro

They say it's insane when  
You think somebody's gonna change  
When they won't  
I'm getting tired of this recital  
Is it really worth fighting for?  
Young lovers seem carefree  
But these bags have gotten heavy again  
I think it's time to break the pattern  
Blame it on me, turn aside and

A lonely road to nowhere  
That's all we are

I wish I never met you  
You've done me so wrong  
I wish I could forget you  
It's been way too long  
It's been 16 hours and 3 long years  
Been trying to wipe these memories and dry these tears  
I wish I never met you  
That's how much I regret you

Contempt is in silence  
You often know violence to me  
You had me feeling like a crackhead  
I squeeze you out just like a blackhead  
Nobody's gonna save you  
And I know better than to blame you alone  
I lay there and take the lashes  
But now I leave you with the ashes

A lonely road to nowhere  
That's all we are

I wish I never met you  
You've done me so wrong  
I wish I could forget you  
It's been way too long  
It's been 16 hours and 3 long years  
Been trying to wipe these memories and dry these tears  
I wish I never met you  
That's how much I regret you

And now the flame's just a flicker  
Down to the wick  
Now tell me who's gonna kill it?  
It burns until you snap it out  
I wanna rub you out  
But love's gonna trick you  
Fuck with your ticker  
Take it down like a brick that's tied to you  
Pulling you down  
Watch me drown

It's been 16 hours and 3 long years  
Been trying to wipe these memories and dry these tears  
I wish I never met you

That's how much I regret you

It's been 16 hours and 3 long years  
Been trying to wipe these memories and dry these tears  
I wish I never met you  
That's how much I regret you

I wish I never met you  
That's how much I regret you
