Return to Paradise

Sam Sparro

(Help us)
Though the robots have
Become intelligent
They'll never replicate the way that I feel

I sent a love letter
Through the internet
You cannot touch it but you know that it's real

I'm secure in my cabin
And circling the planet
And I'd love to hear from you

Though my screen is delaying
I can't hear what you're saying
Hope the war is over soon

Posing as human those androids have ruined
The forest, the seas, and the skies

Close your eyes
Return to Paradise
We'll turn their lies to lullabies

...enemies
Are plain in front of me
They could have helped us but we led them astray

The new technology
And ideology
Have disconnected we were never the same

Through the blink of an eyelid
And through a million light years
And we're back beneath the moon

Though the human condition
And race is in the mission
Hope that love will get here soon

Posing as human those androids have ruined
The forest, the seas, and the skies

Close your eyes
Return to Paradise
We'll turn their lies to lullabies (2x)

Just close your, close your eyes
Return to life
Return it back to life

Close your eyes
Return to Paradise
We'll turn their lies to lullabies
