

# Me Without You

Sam Tsui

No, I don't understand  
How I held it together  
Before I could hold your hand  
And I can't, I can't recall  
If I knew who I was before  
You knew me flaws and all

Whoa, feels like a lifetime ago oh,  
And do you know

Who did I used to be?  
How was there ever me without you?  
Don't want to ever be without you  
Without you, me without you

Baby I can't believe  
I ever lived or breathed without you  
Don't let me ever be without you  
Without you, me without you

Lost at sea, I found your shore  
And I can't crumble back to the man  
That I was before  
You're all I am, I'm only this  
Since my world was reset  
For the better at our first kiss

Whoa, the only world that I know oh,  
Is yours alone

Who did I used to be?  
How was there ever me without you?  
Don't want to ever be without you  
Without you, me without you

Baby I can't believe  
I ever lived or breathed without you  
Don't let me ever be without you  
Without you, me without you

And what did I dream about before I knew your face?  
In this empty world how did I fill that space?  
It's now as though I've always known you'd be the one  
To change my life and make the man  
That I've become, I've become

Oh, who did I used to be?  
And how was there ever me without you?  
Don't want to ever be without you  
Without you, me without you

Baby, I can't believe  
I ever lived or breathed without you  
Don't let me ever be without you  
Without you, me without you, oh  
No, don't let me ever be without you  
Without you, me without you

I don't understand  
How I held it together  
Before I could hold your hand
