

## Soul Invictus

Samael

All that you've never seen now you can feel  
All that has yet never been now is for real

What was behind is now right in front of me  
I'm looking further than my eyes can see

All that you've never seen now you can feel  
All that has yet never been now is for real

Where the will is strong there'll always be a way  
The dream goes on forever and a day

Soul invictus - soul invictus

The Universe's pulsing right under my skin  
I'm standing higher where the air is thin

No longer holding in we let it out  
No more silent screams now we can shout

Where the will is strong there'll always be a way  
The dream goes on forever and a day

Soul invictus - soul invictus

What was behind is now right in front of me  
But I'm looking further than my eyes can see

Souls is growing - stretching endlessly  
Now I'm moving into Infinity
