How long is a life how many ways can you try on How long is your life how many ways did you try on don't need to reach the end when you know what's there no one knows what's there... get in get out don't lose time in the roundabout get in get out read your map if you ever doubt try on try out all different sense try on reach out for distant suns

the way we take, the one we don't
the one we left, the one we change
the one that burns, the one that freezes
the one we built, the one we are
along the way there's some ways we take another way

got power to ponder to construct to structure to be tuned, uninterfered to conquer our inner self to prevent and assure to invent our future

fighting the resistance of time with persistence of faith softly, cunningly, cleaning the dirt wildly, radiantly, drowning the rebirth

winged by pressure dazzled by pleasure distorted absorbed restored again and again

there's an after to every now... an answer to every how there's an after to every now

the way we take, the one we don't
the one we left, the one we change
the one that burns, the one that freezes
the one we built, the one we are
along the way there's some ways we take another way

there's a way there's one way and that is the way there's a way away
