

## Just a Dream

Samantha Fox

I wake up, I wake up  
What does it mean to dream  
Is it staying alive or to fall or rise  
So take it to the limit and lets dream on, dream on

I wake up, to find you  
To find you next to me  
I reach out, yeah  
You're there like a vision of ecstasy

But when I wake up  
I realise, I'm holding on to a dream  
(don't you know it's just a)  
You're just a dream to me  
(you're just a dream to me)  
A part inside of me  
(a part inside of me)

You're just a part of a dream in me  
You're a dream in me  
I feel cold  
As your, as your shadow moves away  
I feel heat  
Heat now

I need you  
I really need you here to stay

You're just a dream to me  
(you're just a dream to me)  
A part inside of me  
(a part inside of me)

You're just a dream  
You're just a part of a dream in me  
You're a dream in me  
You're a dream in me  
You're a dream in me  
You're a dream in me  
You're a dream in me

It's so nice to dream  
But then again  
Your dreams are not always reality  
It seems we're always searching  
Searching for that real dream  
Dream, dream...
