

You And Me

Samantha Fox

It's not a question of your sanity
More of a lesson in humanity
You knew the score
You always wanted more
Another lover you could choose to be
A question mark about your sexuality

Surrounded by strangers
And I never knew your face before
And now I know it's you it's me
What's it gonna be

It's you
It's me
What's it gonna be

A crime of passion is the price you pay
A stolen moment is the only thing you gave
You knew the score
You always wanted more
Within the boundaries of what you believe
You'll find a truth and it will set you free

Surrounded by strangers
And I never knew your face before
And I know it's you it's me
What's it gonna be

It's you
It's me
What's it gonna be
