

Only Just Begun

Samantha Jade

Run away, run away, don't think about it
Hide away, hide away, I think I found it
I know you know we know where we go
Nobody goes

Far away, far away, don't dream about it
Yesterday, yesterday is far behind us
I know you know we know where we go
Nobody goes

I can see it in your afterglow
We have something so be human
We can feel it with the lights down low
This is far from an illusion
Ay, ay, ay, keep closing my eyes
I pray it won't fade to dust
'Cause tonight we've only just begun
We've only just begun,
We've only just begun

Love stoned, love stoned, surrender to it
Let it go, let it go, fall back into it
I know you know we know where we go
Nobody goes

Deep inside our minds, there's no space up top
There's no you and I
Which is shine as one, underneath the sun
Where we all came from

I can see it in your afterglow
We have something so be human
We can feel it with the lights down low
This is far from an illusion
Ay, ay, ay, keep closing my eyes
I pray it won't fade to dust
'Cause tonight we've only just begun
We've only just begun,
We've only just begun

Oh, let the sky fall in your mind
Oh, we can catch it every time

I can see it in your afterglow
We have something so be human
We can feel it with the lights down low
This is far from an illusion
Ay, ay, ay, keep closing my eyes
I pray it won't fade to dust
'Cause tonight we've only just begun
We've only just begun,
We've only just begun
We've only just begun
