

To Walk The Night

Samhain

To walk the night
To feel no love
To know the touch of another kiss
Never more

To walk the night
To forever roam
To escape inside cool darkness
Alone

I have wandered my whole life long
The night becomes my bride and everything else must die
World without end
For me

Unearthly night
World you fear
Love lies lurking, a wounded dingo-dog
Soon to de cease

I have wandered my whole life long
The night becomes my bride and everything else must die
World without end
For me

To walk the night
Solitary friend
Night ethereal
World without end
Forever more
Forever
