Let It Ride

I thought we was the same Baby had the same mind You and me we came Baby at the same time It took a while to love you but I had to make you mine Glad I found someone that's right But I started hearing rumors and I didn't like their sound Said you had another life way cross town I put a lot of honesty and trust into you And now I'm really thinking 'bout all girls I lied to

A lie don't care who tell it, baby All the time I thought you was my lady I try to be without but it drives me crazy There's only one thing to do

I gotta let it ride, let it ride let it ride... I gotta let it ride, let it ride That's the only thing that I can do

Maybe I jumped in too fast Should've took my time But I was so excited that you wanted to be mine Girl I was straight with you I didn't play no games stayed true Even when my boys said that I was a fool

I gotta let it ride, let it ride let it ride... I gotta let it ride, let it ride let it ride That's the only thing that I can do Sammie
