

# Me And Maxine

Sammy Kershaw

I used to kiss Maxine through the front door screen  
Standin' on her mama's steps  
And if her daddy hadn't come along and run me off  
I know I'd have never left

It's a cryin' shame but that's the way it was  
Somethin' always there to separate us

Well, I tried not to let it show  
But everyone seemed to know  
There's something between me and Maxine

She used to wave at me from across the street  
Through her bedroom window every night  
She was almost close enough for me to touch  
But I still couldn't hold her tight

That's how it's been right from the start  
Always somethin' there to keep us apart

Well, I tried not to let it show  
But everyone seemed to know  
There's something between me and Maxine  
There's something between me and Maxine

All the things that came between us  
Couldn't change a thing  
Now we're together and that's how we're gonna stay  
'Cause our love just grows a little more with everyday

No, I'm never gonna let her go  
'Cause in my heart I know  
There's something between  
Oh, I just wanna hold her close  
'Cause in my heart I know

There's something between  
There's something between  
There's something between  
Me and Maxine, me and Maxine

I know, I know there's somethin'  
Somethin' between  
I know, I know there's somethin'  
Somethin' between me and Maxine  
Somethin' between me and Maxine
