

Emily

San Fermin

It's never enough in the moment
No matter who I go home with
Late nights awake and alone with
Myself again, and it's lonely
I'm good, I'm good, it's a good time
Keeping all my colors in a straight line
I can't believe it all comes to nothing.

Emily, let the night take me
Down down down the rabbit hole
Dug in deep with my unbelief
And I'm running on empty
Three four five, on the steps we ride
Down down down the rabbit hole
Gotta get out of my head tonight

Let's forget about it, oh
Leave it all alone tonight
And we're waiting on a moment when it feels right
Don't want to talk about it, oh no
I got everything I need
Don't leave me lonely
Don't leave me lonely baby

Here in my blurry condition
I hide myself in the room and
Just tell them all that it's nothing
Alone with all of these humans
In a fever, leaving after midnight
Young unbeliever in the dim light
I can't believe it all comes to nothing

Emily, let the night take me
Down down down the rabbit hole
Dug in deep with my unbelief
And I'm running on empty
Three four five, on the steps we ride
Down down down the rabbit hole
Gotta get out of my head tonight

Gotta get out of my head tonight
(down down down the rabbit hole)
Gotta get out of my head tonight
(don't leave me lonely baby)
Gotta get out of my head tonight
(down down down the rabbit hole)
Gotta get out of my head tonight
Gotta get out of my head tonight
Gotta get out my head tonight
