

## Bend Not Break

Sanctus Real

Time will tell if we really have what it takes  
This live can crush us underneath its weight  
When the river rushes over your feet  
When the bulls are running through your streets

You don't have to run from the fears behind you  
Turn around and I'll stand beside you  
Take my hand and remember  
We may bend but will not break  
Together we may bend  
But will not break

Oh, on the front line you're gonna feel the bullets, gonna feel  
the heat  
And when the battles that you fight call you to turn the other  
cheek  
When the fire at your back burns bright  
And when the mountains up ahead are so high

You don't have to run from the fears behind you  
Turn around and I'll stand beside you  
Take my hand and remember  
We may bend but will not break  
Steel your heart and lift your head  
'Cause we have love and faithfulness  
So take my hand and remember  
We may bend but will not break  
Together we may bend  
But will not break

And if ever you should feel like giving up  
Remember that God is with us  
And if ever you should fear you may lose  
Remember that you don't have to run
