Easier On My Heart

Sanctus Real

If I could run the distance Between Your heart and mine If I could climb my way up To the highest point I could see everything that You want me to see I could breathe the air that You breathe I want to breathe the air that You breathe

It would be a little easier on my heart If I had a taste of Heaven It would be a little easier to hang on If it wasn't so hard to imagine Take, take, take me in Your arms Take, take, take me in Your arms Take me in Your arms Make it a little easier on my heart

I've wandered lonely spaces In search of who You are I hold the times I'm with You So closely to my heart How else could I know the power of love If it never lifted me up If it never lifted me up

C'mon take, take, take me in Your arms Don't let me get away Hold me close to Your heart Take, take, take, me in Your arms Don't let me fall away When I'm falling apart
