

Between Me & the Moon

Sandra

in a room without ceiling
no roof without a wall
can't escape from my feeling
whatever stands will fall

be silent now
we spin round and round

there's a light I see
at the end of the street
a million miles to you
between me and the moon
you come back to me
bring back my belief
a long way to you
between me and the moon

every moment of weakness
takes me back to you
in between light and darkness
there's something we once knew

be silent now
we spin round and round

there's a light I see
at the end of the street
a million miles to you
between me and the moon
you come back to me
bring back my belief
a long way to you
between me and the moon

be silent now
we spin round and round

there's a light I see
at the end of the street
a million miles to you
between me and the moon

there's a light I see
at the end of the street
a million miles to you
between me and the moon
you come back to me
bring back my belief
a long way to you
between me and the moon

there's a light I see
at the end of the street
a million miles to you
between me and the moon
you come back to me
bring back my belief

a long way to you
between me and the moon

you come back to me
bring back my belief
a long way to you
between me and the moon
