

## Sun in Disguise

Sandra

I don't know your name or where you are  
(But) every night you seem to real  
Talking to me

Glowing Face behind the stars  
Am I insane to get this far?  
You're soothing my soul

The moon is like the sun in disguise  
Shadows are seducing the lights

Touch my heart - receive the sign  
Ready now to cross the line  
Cause the night is my friend  
Superseding  
Grabbing your hand

The moon is like the sun in disguise  
Shadows are seducing the lights
