Sun in Disguise

Sandra

I don't know your name or where you are
(But) every night you seem to real
Talking to me

Glowing Face behind the stars Am I insane to get this far? You're soothing my soul

The moon is like the sun in disguise Shadows are seducing the lights

Touch my heart - receive the sign Ready now to cross the line Cause the night is my friend Superseding Grabbing your hand

The moon is like the sun in disguise Shadows are seducing the lights
