

The Night Is Still Young

Sandra

The night is still young
Take my hand and hold on
Let's party tonight
And make love till the moon is gone
The night is still young

Groovin' on the dance floor
Bass is boomin'
In a cloud of motion
Hips are moving

I can tell you want me
Teasin' pleasin'
But I got no time for games
So no deceiving

I know you waited so long
To feel my love

Feel my love
If your timing's right baby
You can taste it tonight

The night is still young
The beat's soundin' tight baby
Take my hand and hold on
Let's party tonight
And make love till the moon is gone
The night is still young
Oh oh

Night to remember won't forget it
Hearts beating faster body's sweating

With every beat it seems I'm falling deeper
No other feeling could be sweeter

I know you waited so long
To feel my love

Feel my love
If your timing's right baby
You can taste it tonight

The night is still young
So are you and I baby
Take my hand and hold on
Let's party tonight
Let's make love till the moon is gone
The night is still young

Everybody gotta shake your body
Do the horizontal mamba
(Groovin' on the dance floor)
Make your momma wanna call the cops
And dad yells Ay caramba
(Let's party tonight)

Let your body express itself
Yeah show me that you felt it
(The night is still young)
(Yeah yeah)

If you're wanting my body
Better make sure that I believe it
(Yeah yeah yeah)

The night is still young
So are you and I baby
Take my hand and hold on
Let's party tonight
Let's make love till the moon is gone
The night is still young

Everybody gotta shake your body
Do the horizontal mamba
