

Slime Green Spaceship

Santa Hates You

In outer space - we make a trip
Interstellar - in our space ship
We fly to you - it's not too far
Just behind that fuzzy orange star

Light speed is - too lame for us
That's why we're here - and not on the space bus
All engines running - so watch us coming
Faster than light - oh yeah, that's alright

In hyperspace - we leave no trace
We're passing asteroids - and flee from androids
We're blowing up - what blocks our way
With our laser gun - oh yeah, that's so much fun

We fly to you - it's not too far
We pick you up - to get drunk in the space bar
We're flying much too fast - just like a race
But hell yeah, there are no cops - in hyperspace

Our slime green space ship - is the best
We're overtaking all the rest

Our slime green space ship - is the best
We're out of sight - so fuck the rest

Bye bye, officer!
