Open Invitation

You be you and let me be me No strings attached emotionally I wanna get a little crazy That's puttin' it plain You got the medicine And I got the pain

When you just wanna feel good Like the doctor said One good dose of loving It's gonna straighten out your head

You got an open invitation On that you can rely You got a prepaid reservation And that's the only way to fly

Let's make love, the feeling is right Just passing by like ships in the night Oughta get a little friendly There's no time like now You bring the attitude and I'll show you how

Anytime you're ready Anytime at all Just come on over Don't even have to call Santana
