

Right Now

Santana

Somebody deceived you, your hearts broken into pieces
Right now I, I know how you feel yes I know
I'm with you, here for you
I know just what you have been through
Baby, I know how you feel

But don't forget about tomorrow put aside your sorrow
And believe me, I'm waiting here deep down inside you
For my turn to guide you, bring you back to me

I love you, said I love you right now
I need you, I need you right now
I want you, said I want you right now
I love you, said I love you right now

You sit there pretty baby, why don't you stop anticipating?
I want to give love to you
I'm standing here and waiting your tears falling down like rain
drops
I want to give love to you

But don't forget about tomorrow put aside your sorrow
And believe me, I'm waiting here deep down inside you
For my turn to guide you, bring you back to me

I love you, said I love you right now
I need you, I need you right now
I want you, said I want you right now
I'm with you, said I'm with you right now

When darkness comes and it surrounds you
There's a light inside you let it show the way
No matter how far you have fallen, you can hear the callin'
This is what is said

I love you, said I love you right now
I need you, I need you right now
I want you, said I want you right now
I love you, said I love you right now

I love you, said I love you right now
I need you, I need you right now
I want you, said I want you right now
I'm with you, said I'm with you right now
