

# Fireflies (Light Messengers)

Saosin

Sinking, falling in too deep and I regret it  
I don't know is all we have left to say  
How do we pick ourselves up now  
If the clouds bring the rain before we evaporate  
I'll never be able to say  
I love you  
I love you, I love you

Stay bright, little fireflies  
Make light before my eyes (2x)

Stay bright, little fireflies  
Make light before my eyes (2x)

Thinking about all my regrets and contradictions  
Where did I go?  
I thought this was the right way  
Do I learn to grow up now  
Or just fade away under this tree of shame  
Or will I be able to say  
I love you, I love you

Stay bright, little fireflies  
Make light before my eyes (2x)

Stay bright, little fireflies  
Make light before my eyes (2x)

(break)

And all you do and all you say  
Washes away - away with rain  
And all you thought would never change  
Washes away, it'll never be the same  
'Cause all I see is and all I feel  
Takes me away, takes me away

And all you do and all you say  
Washes away - away with rain  
And all you thought would never change  
Washes away, it'll never be the same  
Stay bright little fireflies  
Make light before my eyes

Stay bright, little fireflies  
Make light before my eyes

Stay bright, little fireflies  
Make light before my eyes

Wish I could love you  
And I don't regret the rain  
And now that I'm sinking  
I will just say goodbye
