

## Old Friends

Saosin

The way divides the victim  
I won't ask for your permission  
I saw dysfunction in your rhythm  
Life just slips away  
Pass right through the first incision  
Everything we are

I'll wait till you've forgotten (I see the way you are)  
If you get past the words that [measure unaffected?]  
[Polarize, insane, fractions that we make?]  
Quietly effortless just as the summer ends

If you could keep the right commitment  
And you put all your hope within him  
I saw dysfunction in your rhythm  
Life just slips away  
Pass right through the first incision  
Everything we are

I'll wait till you've forgotten (I see the way you are)  
If you get past the words that [measure unaffected?]  
[Polarize, insane, fractions that we make?]  
Quietly effortless just as the summer ends

It won't be my decision (Don't wait for me)  
I didn't ask for your permission (It won't be long)  
No way divides the victim (It rips away)  
I didn't ask for your permission (It won't be long)  
It won't be my decision (Don't wait for me)  
I didn't ask for your permission (It won't be long)  
No way divides the victim (It rips away)  
I didn't ask for your permission (We connect with something any way)
