

# Not Alone

Sara Bareilles

It comes calling in the evening  
When the temperature is dropping out  
They said it don't get cold here  
But I beg to differ now

There is something in the shadows  
More than sister silhouette  
Something sinister and strange  
That I haven't seen yet

And I don't want to be alone  
Sky, don't let the sun go  
I'm not ready for the darkness  
Swear upon a heartless soul

And I don't want to cry when you go  
Stay a little longer, you know  
You're making me feel  
I'm not alone

You don't have to fight the bad guys  
Throwing punches out into the black  
If you have to tell me lies, I don't care  
Just give me some good back

I don't want to be alone  
Sky, don't let the sun go  
I'm not ready for the darkness  
Swear upon a heartless soul

And I don't want to cry when you go  
Stay a little longer, you know  
You're making me feel  
I'm not alone

And if I only worry 'bout it  
Worry 'bout it, worry 'bout it  
I just keep breaking down  
Breaking down, breaking down

Boy, I could do without  
Do without, do without  
A night of the bad dreams, sad things  
Tell me what that means

I don't want to be alone  
Sky, don't let the sun go  
I'm not ready for the darkness  
Swear upon a heartless soul

And I don't want to cry when you go  
Stay a little longer, you know  
You're making me feel  
The monsters aren't real  
You're making me feel  
I'm not alone
