## The Secrets That We Keep

Sara Evans

Across a crowded room I can't keep my eyes off you You take my breath away Looking at me now I know what you are thinking about You are thinking about the way You woke me up this morning and made sweet love to me Oh baby I love the way you touch me You know my body so well You do much more than love me 'til I'm overwhelmed Wrapped up inside of you is where I want to be Because no body knows No body knows No body knows the secrets that we keep Once we get inside these four walls All the hesitation falls We can't wait no more As you help me get undressed you don't have to guess Baby you know what I want I want to love you til the sun comes up Til I am sure you are satisfied Oh baby I love the way you touch me You know my body so well You do much more than love me 'til I'm overwhelmed Wrapped up inside of you is where I want to be Because no body knows The secrets that we keep, yeah. Ohh, Wrapped up inside of you Is where I want to be 'Cause no body knows No body knows No body knows No body knows The secrets that we keep.
