

From This One Place

Sara Groves

I was about to give up and that's no lie
cardinal landed outside my window
threw his head back and sang a song
so beautiful it made me cry

Took me back to a childhood tree
full of birds and dreams

From this one place I can't see very far
in this one moment I'm square in the dark
these are the things I will trust in my heart
you can see something else
something else

I don't know what's making me so afraid
tiny cloud over my head
heavy and grey with a hint of dread
I don't like to feel this way

Take me back to a window seat
with clouds beneath my feet

From this one place I can't see very far
in this one moment I'm square in the dark
these are the things I will trust in my heart
you can see something else
something else
