

## Right Now

Sara Groves

I'm tired of blaming everybody else  
I'm sorry if I blamed you  
I have everything I need to be myself  
I have what I need to love you  
There's no way to brace myself  
There's no way to sort it all out  
What you need from me I can do it right now  
I can do it right now  
What you need from me I can do it right now  
What you want from me I can do it right now  
What you want from me I can do it right now  
I can do it right now
