

Right Now

Sara Groves

I'm tired of blaming everybody else
I'm sorry if I blamed you
I have everything I need to be myself
I have what I need to love you
There's no way to brace myself
There's no way to sort it all out
What you need from me I can do it right now
I can do it right now
What you need from me I can do it right now
What you want from me I can do it right now
What you want from me I can do it right now
I can do it right now
