

Night After Night

Sara Storer

Weekends when I go out walking
Friends stop and they say hello
They ask me how things are going
I put on a show, a very good show
I tell them that I'm doing fine now
They smile and then they go on their way
It's so easy to put on a brave face
In the bright light of day before stars hold sway

But I still miss you
Whenever I turn out the light
I still miss you
Night After Night After Night After Night

They say that time is a healer
And all bad things come to an end
Well sometimes I almost believe it
Then darkness comes in
And I fall again

I wish I could sleep like a baby
I wish I could sink like a stone
I wish that I could not remember
Your sweet loving moan
When we were alone

And I still miss you
Whenever I turn out the light
I still miss you
Night After Night After Night After Night
